During week 5 and 6 the students will participate in a variety of language experiences. These activities are hands on, exciting and stimulating. This encourages children to talk and discuss what we are doing. Photos are usually taken as a way of reflecting on the activity. After discussion, some writing will usually take place. Writing may be independent, as a class or modelled by the teacher.

Numeracy
Over the next fortnight students will continue building up their skills to identify groups of more and less, begin to understand tens frames and their recognition of numerals and groups of objects. We will also revisit 2D shapes to help consolidate and extend students understandings. We will also be focussing on creating pictographs. Students will be able to survey their classmates about their favourite fairytale.

Friday 11th May, 2012
Parent Tip
Student Absences
If your child is absent from school, you can ring our school on 9702 8688 and leave a message with the office staff to let the teacher know that your child will be away. If you are unable to contact the school on the day of your child’s absence, we ask that you supply your child’s teacher with a note stating why your child was away.

Thank you for your continued support,
The Prep Team.
